

WEBSITES • SOFTWARE • APPS

We build fast, sharp software that holds up when it actually *matters*.

Summit Studios is a web and software studio in Mangaluru, working with clients across India and internationally. We design and build websites and custom software end to end, so you can get on with running the business.

BACKEND & SUPPORT

Built across *industries*.

Summit Studios is a web and software studio based in Mangaluru, working with clients across India and internationally. The portfolio runs from surgeons, speciality clinics and multi-branch practices to enterprise software, retail brands, logistics, hospitality, professional services and education, built up over many projects and still growing.

Every project is delivered by senior people from the first call through to launch and beyond. No junior bench, no handover once the contract is signed, and no templates — which is why none of the work on the following pages looks like any of the rest of it.

IDEA TO LAUNCH, IN-HOUSE

Two things, done *properly*.

Websites that bring you customers, and the software that runs everything behind them. Both built in-house, by the same people.

01 Websites that bring in customers

Fast, mobile-first sites that turn a visitor into a booked appointment or a paying customer.

CLINIC & PRACTICE SITES

BUSINESS & BRAND SITES

E-COMMERCE STORES

SEO & GOOGLE SETUP

02 Web apps & dashboards

Dependable web apps on a clean foundation that will not fall apart as you grow.

DASHBOARDS & PORTALS

INTERNAL TOOLS

MARKETPLACES

SAAS PRODUCTS

03 Custom CRMs & software

Software shaped around how you actually work, not a tool you have to bend to fit.

LEAD & PATIENT MANAGEMENT

REPORTING

WORKFLOW AUTOMATION

INTEGRATIONS

04 iOS & Android apps

Apps that feel quick, taken all the way through to the App Store and Play Store.

IOS & ANDROID

CROSS-PLATFORM

OFFLINE-FIRST

APP STORE LAUNCH

05 Backend, maintenance & growth

Secure APIs and databases that carry real traffic, plus ongoing fixes and new features.

CLOUD & INTEGRATIONS

MONITORING

ONGOING SUPPORT

Understand it first. Build it *second*.

01

Figure it out

We dig into what you are really trying to do before anyone writes a line of code. Often the brief you arrive with is not the problem worth solving.

02

Design it

We sketch, prototype and get it in front of you early, so there are no surprises at the end and no six-week reveal that misses.

03

Build it

We ship in small pieces you can see and use, instead of disappearing for months and hoping it lands.

04

Look after it

After launch we keep it healthy and help it grow as you learn what your customers actually respond to.

You see the thing taking shape the whole way through. Nothing is revealed at the end for the first time.

The reasons clients actually *give*.

You talk to the people building it

No account manager in the middle, no handover to a junior team once the contract is signed. The person who understands your project is the person writing the code.

We tell you when to spend less

If a smaller build gets you the same result, we will say so. Talking someone into work they do not need is a bad way to earn a second project.

Nothing is a template

Every build starts from your business, not from a theme with your logo dropped in. That is why none of our sites look like each other.

We are still there after launch

Launch is the halfway point. We keep things patched, quick and improving as you learn what your customers actually do.

START A CONVERSATION

Tell us what you are working *on*.

We will tell you honestly whether we are the right people for it, roughly what it takes, and what we would do first. No obligation, and no sales call.
